

The "ROLL" nailing tape is a high-strength polypropylene fabric tape for quick and secure direct fastening of pipes, cables and electrical cables. The nailing tape is easy to work with steel nails, hand nailers and bolt setting tools. Despite its extreme tear resistance, the "ROLL" nailing tape is much more flexible than perforated metal tape and minimises vibrations. With no risk of rust and a temperature resistance of up to 100°C, it can also be used for laying heating pipes. Another advantage is the convenient removal from the practical dispenser roll.
