

The "EASY" metal plasterboard plug is ideal for installation in plasterboard and gypsum fibreboard. It can also be used as a fixing element in aerated or aerated concrete. The plug is equipped with an integrated drill point. No additional setting tool is required when screwing in, a standard Phillips screwdriver is sufficient. The centre point enables precise positioning at the desired point. Thanks to its strongly moulded thread, this plug has a high holding force. It is suitable for use with wood and chipboard screws.
